1

WHAT IS PCT?

The **Posh Compliance Tracker (PCT)** is a web-based system for managing warehouse compliance. It helps your team track maintenance contracts, licences, quality activities, staff training, assets, and legal cases — all in one place. The system automatically sends email alerts when items are due so nothing is missed.

Access PCT on any browser, on any device. No installation needed.

■ **PCT URL: ich-dashboard-ten.vercel.app** Use the username and password shared by your administrator to log in.

2

WHO USES PCT AND WHAT THEY DO

PCT has multiple user roles at your location. Each role controls what you can see and do in the system. You will only ever see data for your own warehouse location.

Role	Can Do	Cannot Do
Staff / Supervisor	Log in · View all modules · Mark Planned · Submit evidence · Action assigned tasks	Delete records · Validate · Add new records · Manage users
Coordinator	All Staff actions + Assign tasks · Add new records · Bulk assign training	Delete records · Validate · Manage users
Quality Manager	All Coordinator actions + Validate evidence · Edit records · Archive records	Delete users · Manage users
Manager	Full access — Add, Edit, Validate, Archive, Assign tasks, Manage users at own location	Access other locations · Create Head accounts

■ You cannot access or view data from any other warehouse location. Each location's data is completely separate and secure.

3

HOW TO LOG IN

1. Open your browser and go to the PCT URL shared by your administrator.
2. Enter your **Username** and **Password** exactly as provided.
3. Click **Login**.
4. You will land on your location's home dashboard.

✓ First login: Change your password immediately. Click your profile icon (top-right corner) → **Change Password**.

■ Can't log in or forgot your password? Contact your PCT administrator. Do not share your login credentials with anyone.

4 THE DASHBOARD — WHAT YOU SEE

When you log in, this is what you see on your location's home dashboard:

Top Bar

Shows your location name, your logged-in username, a ■ notification bell showing how many alerts are active, and a global search icon.

Summary Cards

Five live summary cards at the top of the screen — Total AMC Contracts · Overdue Items · Pending Approval · Total Licences · Expiring or Expired Licences. These update in real time as records change.

Left Sidebar Navigation

Click any item to switch to that module: Home · AMC · Licences · Quality · Training · Assets · Legal · Vendors · Alerts · Activity Log · My Tasks.

Notification Bell

Shows a red badge with the number of active alerts. Click it to go directly to the Alerts tab.

Global Search

Click the ■ search icon. Type at least 2 characters to instantly search across AMC, Licences, and Quality at the same time. Click any result to jump directly to that record.

Home Screen Performance Panel

Shows this week's activity summary — who submitted, who validated, how many actions were taken. Also displays the Training Qualification Matrix showing each staff member's SOP completion status at a glance.

5

AMC — ANNUAL MAINTENANCE CONTRACTS

This module tracks all maintenance service contracts for equipment at your warehouse — AC units, fire extinguishers, DG sets, weighing scales, AHUs, pest control equipment, temperature sensors, CCTV, sprinkler systems, and so on.

5.1 AMC Stage Flow

Every AMC record moves through the following stages in sequence:

PENDING	Service is due. No action taken yet.
PLANNED	Vendor visit scheduled. Planned date entered.
SUBMITTED	Vendor visited. Service report uploaded as evidence.
VALIDATED	Manager has reviewed and approved the evidence.
COMPLETED	Record closed. System auto-calculates next service due date from the Frequency field. You can also edit this date manually if required.
OVERDUE	Due date passed with no action. System marks this automatically.

5.2 How to Action an AMC Record

- Click the **AMC** tab in the left sidebar.
- Find the record — use the search bar or filter by date.
- Click the **Action** button on the record.
- Based on the current stage, do the following:

If PENDING: Click **Mark Planned** → Enter the scheduled vendor visit date → Save.

If PLANNED: Click **Submit Evidence** → Upload the service report (PDF, image, Word, or Excel accepted) → Add remarks (min 5 characters) → Submit.

If SUBMITTED: Manager clicks **Validate** if evidence is acceptable (remarks mandatory, min 10 characters), or **Send Back** if corrections are needed (reason mandatory, min 10 characters).

If VALIDATED: System auto-calculates next service date from Frequency and marks record **Completed**. Edit the date manually if required.
- Every action is automatically logged with your name, role, and timestamp.

5.3 Evidence Rules

Submit Evidence	Attach a file OR type a remark — minimum 5 characters . Both blank = system blocks submission.
-----------------	---

Validate	Remark is mandatory — minimum 10 characters . Empty remark = system blocks validation.
Send Back	Reason is mandatory — minimum 10 characters . Staff must re-submit with corrections.

5.4 AMC Bulk Action

Managers and Quality Managers can update the status of multiple AMC records at once without actioning them one by one.

- 1. In the AMC tab, tick the checkbox on the left of each record you want to update.
- 2. A bulk action toolbar appears at the bottom of the screen.
- 3. Select the new status to apply to all selected records.
- 4. Click **Apply** — all selected records update simultaneously.
- 5. Each update is logged in the Activity Log automatically.

■ Bulk Action is for status updates only. Evidence upload and remarks must still be done individually per record.

5.5 How to Add a New AMC Record

✓ Quick Template: When you click + **Add AMC**, select an Equipment Type from the Quick Template dropdown first (e.g. DG Set, Fire Extinguisher, AHU, Weighing Scale). The system auto-fills the Frequency and AMC Period for that equipment type — saving you time and reducing errors.

Field	What to Enter
Equipment Name *	Full descriptive name including unit/model. e.g. Split AC — Warehouse Floor
Serial No	Manufacturer serial number if available.
Vendor Name (Actual) *	Name of the company actually performing the service.
Approved Vendor Name	Name from your approved vendor list — may differ from actual vendor.
AMC Period	Duration of the contract. e.g. 12 Months, 24 Months.
Frequency *	How often service is done: Monthly / Quarterly / Biannual / Annual.
Next Service Due Date	When the next service is due.
Deadline	Internal completion deadline — can differ from the service due date.

Click **Add Record** to save. Fields marked * are required.

How to edit: Click the — pencil icon on any record → update fields → Save.

✓ Export PDF: In the **AMC** tab, click the ↓ **Export PDF** button (top-right of the tab). The system generates and downloads a PDF report of your current filtered view automatically.

6

LICENCES

Tracks all regulatory and compliance licences for your warehouse — Drug Licence, GST, Fire NOC, Pollution Control Consent, Trade Licence, Weights & Measures, Labour Licence, and so on.

6.1 How to Renew a Licence

- 1. Click the **Licences** tab.
- 2. Find the licence that is expiring or has already expired.
- 3. Click **Renew** on that licence record.
- 4. Enter the new expiry date — status automatically changes to **Active**.
- 5. Upload the renewed licence document as evidence.

6.2 How to Add a New Licence

Field	What to Enter
Licence / Agreement Name *	Full name. e.g. Drug Licence, Fire NOC, Trade Licence.
Company / Authority	Issuing authority or company name.
Licence No / Key	The licence number or registration key.
Contact Person	Your point of contact at the issuing authority.
Contact No	Phone number of the contact person.
Issue Year	Year the licence was originally issued.
Expiry Date *	Date the licence expires. System will auto-alert before this date.
Renewal Due Date	If renewal must begin before the expiry date, set this field separately.
Competent Person	The qualified person responsible for this licence at your location.
Remarks	Any additional notes.

■ Lifetime licences (e.g. GST Registration) do not expire. These are flagged separately and will not generate expiry alerts.

How to edit: Click the = pencil icon → update fields → Save. If you enter a future expiry date, the status automatically corrects to **Active**.

7

QUALITY

Tracks all scheduled quality checks and activities at your warehouse.

■ **Activity types:** Daily Housekeeping · Fortnightly Housekeeping · Pest Control Inspection · Mock Recall Drill · Fire Safety Drill · Documentation Audit · Calibration · Training

Each activity shows: Activity Name, Type, Sub-Category, Assigned Person, Scheduled Date, Frequency, and Status. If the scheduled date passes with no action, the system automatically marks it **Overdue**.

7.1 How to Log a Completed Activity

1. Click the **Quality** tab.
2. Find the activity in the list.
3. Click **Action** on the activity.
4. Enter the completion date and any remarks.
5. Upload evidence if required — e.g. housekeeping checklist photo, drill attendance sheet, calibration certificate.
6. Click **Save**. Status updates to **Completed**.

■ Evidence rules apply here too — Submit requires a file OR remark (min 5 chars). Validate requires a remark of at least 10 characters.

7.2 How to Add a New Quality Activity

Field	What to Enter
Activity Name	Descriptive name. e.g. Monthly Pest Control — Warehouse Floor
Activity Type	Training / Daily Housekeeping / Fortnightly Housekeeping / etc.
Sub-Category	Housekeeping / Pest Control / Training
Description	Details about the activity and what it involves.
Assigned To	Person responsible for completing this activity.
Scheduled Date	When this activity is due. System auto-marks Overdue if date passes.
Deadline	Internal deadline — can differ from Scheduled Date.
Frequency	How often this activity repeats: Daily / Fortnightly / Monthly / etc.

How to edit: Click the — pencil icon → update → Save.

✓ Export PDF: In the **Quality** tab, click the ↓ **Export PDF** button (top-right of the tab). The system generates and downloads a PDF report of your current filtered view automatically.

8

TRAINING

Tracks all staff training records and SOP completion across your team. Every employee's training history is recorded here — what SOP they were trained on, when, by whom, and when they are due for retraining.

8.1 Training Record Statuses

NOT STARTED	Training has not been assigned yet.
PENDING	Assigned but training not yet completed.
COMPLETED	Training done. Next due date calculated from frequency.
RETRAINING DUE	Next due date has passed. Retraining is required.

8.2 Training Qualification Matrix

Your home dashboard shows a matrix grid — rows are SOP names, columns are staff members. Each cell shows whether that person has completed that SOP: ✓ **Green** = Completed · ■ **Yellow** = Pending · ✕ **Grey** = Not Started · ■ **Red** = Retraining Due. Mandatory SOPs with gaps are highlighted in red. This gives you an instant view of your team's compliance status without opening individual records.

8.3 How to Add a Training Record (Single Person)

Field	What to Enter
Employee Name *	Full name of the staff member.
Department	Their department or team.
SOP / Training Name *	Name of the SOP or training session. e.g. Cold Chain Handling SOP.
Mandatory	Is this training mandatory? Yes or No.
Assigned Date	Date the training was assigned.
Completion Date	Date the training was completed.
Next Due Date	Auto-filled from Completion Date + Frequency. Edit manually if needed.
Frequency	How often this training repeats: Annual / One-time / etc.
Trainer Name	Name of the person who conducted the training.
Evidence	Upload signed attendance sheet, certificate, or photo proof.

8.4 Bulk Assign Training (Group Session)

If an entire team attended the same session, use Bulk Assign instead of adding records one by one.

- 1. Click  **Bulk Assign** button in the Training tab.
- 2. Enter the SOP / Training Name.
- 3. Select all the employees who attended.
- 4. Fill in the completion date, frequency, and trainer details.
- 5. Click **Save** — one record is created per employee automatically.
- 6. Employees who already have this SOP recorded are skipped automatically.

How to edit: Click the = pencil icon on any training record → update → Save.

✓ **Export PDF:** In the **Training** tab, click the ↓ **Export PDF** button (top-right of the tab). The system generates and downloads a PDF report of your current filtered view automatically.

9

ASSETS

Tracks all physical equipment and assets at your warehouse — forklifts, CCTV systems, generators, compressors, weighing machines, cold chain equipment, fire equipment, and so on.

The asset list shows: Asset Number, Equipment Name, Plant Code, Owner (Hub or Abbott), and AMC linkage. Click any column header to sort the list.

9.1 How to Add an Asset

Field	What to Enter
Asset Number	Your internal asset or equipment number.
Equipment Name	Full descriptive name of the asset.
Plant Code	Plant or location code for this asset.
Owner	Who owns the asset — Hub or Abbott.
Quantity	Number of units of this asset.
AMC (yes/no)	Does this asset have an AMC? Link to the AMC record if yes.
Location	Your warehouse location name.

9.2 Bulk Upload Assets (CSV)

1. In the Assets tab, click ■ **Download template** — this downloads a CSV template file.
2. Open the template in Excel and fill in your asset data. Columns: Owner (hub/abbott), Asset No, Asset Name, Plant Code, Quantity, AMC (yes/no), Location.
3. In Excel, go to **File** → **Save As** → **CSV (Comma delimited)**. Save as **.csv format only** — the system does not accept .xlsx files directly.
4. Back in PCT, click ■ **Bulk Upload** in the Assets tab.
5. Click **Choose CSV file** and select your saved CSV file.
6. Review the preview — it shows how many assets will be imported.
7. Click **Import** to complete. Assets are added and the Activity Log is updated automatically.

■ Upload file must be saved as **.csv format** — not .xlsx or .xls. Fill the data in Excel, then Save As CSV before uploading.

How to edit: Click the = pencil icon on any asset → update → Save.

10

LEGAL CASES

Tracks all active legal matters involving your warehouse — cheque bounce cases, recovery suits, consumer cases, labour disputes, and so on.

■ **Case Types:** Cheque Bounce · Recovery Suit · Consumer Case · Labour Dispute · Contract Dispute · Criminal Complaint · Other

■ **Case Statuses:** Open → In Progress → Hearing Scheduled → Settled / Closed / Dismissed

10.1 Escalation Chips

Each case card shows an escalation chip next to it indicating the urgency of the next hearing date:

OVERDUE	Hearing date has already passed. Immediate action required.
WITHIN 3 DAYS	Hearing is within 3 days. Prepare and act now.
WITHIN 14 DAYS	Hearing is within 14 days. Begin preparation.
NO DATE SET	No next hearing date entered. Update the record immediately.

10.2 How to Add a New Legal Case

Field	What to Enter
Case Number	Your internal or court-assigned case number.
Case Title	Short descriptive title of the case.
Court Name	Name of the court where the case is filed.
Party Name	Name of the other party in the case.
Case Type	Select from the list: Cheque Bounce, Recovery Suit, etc.
Status	Current status: Open / In Progress / Hearing Scheduled / etc.
Filing Date	Date the case was originally filed.
Next Hearing Date	Date of the next scheduled court hearing. Update after every hearing.
Amount	Amount involved in the case, if applicable.

Notes	Additional details, lawyer name, or case summary.
-------	---

10.3 How to Update a Case After a Hearing

1. Find the case in the Legal tab.
2. Click **Edit**.
3. Update the **Next Hearing Date** and **Status**.
4. Add notes from the hearing.
5. Click **Save Changes**.

✓ To close a case: Edit the record → change Status to **Settled**, **Closed**, or **Dismissed** → Save. The case stays on record but stops generating escalation alerts.

11 MY TASKS / ASSIGNMENTS

Shows tasks that the manager has assigned specifically to you. You will see the task name, which module it is from (AMC, Licence, or Quality), the due date, and its current status.

How to Complete an Assigned Task

1. Click **My Tasks** in the left sidebar.
2. Click the task assigned to you.
3. Take the required action — upload evidence, update status, or add remarks.
4. Mark it as done.

■ Managers assign tasks from inside any AMC, Licence, or Quality record using the **Assign** button, and can set a Deadline for completion.

12 VENDOR DIRECTORY

The Vendor Directory is automatically built from contact details entered in AMC and Licences. You do not need to enter anything here separately.

You will see: Vendor Name, Contact Person, Phone Number, type (AMC Vendor or Licence Contact), and all equipment or licences linked to that vendor.

■ **To search:** Type any vendor name, phone number, or equipment name in the search bar inside the Vendors tab. **To update vendor details:** Edit the contact fields inside the linked AMC or Licence record. The Vendor Directory updates automatically.

13

ALERTS

The system automatically emails you when items are approaching expiry or are overdue. You do not need to set anything up — alerts run on their own.

13.1 Alert Thresholds

Threshold	Urgency	Action Required
30 days before	Early warning	Plan renewal / service
15 days before	Action needed	Initiate the process
7 days before	Urgent	Follow up with vendor / authority
3 days before	Critical	Escalate immediately
1 day before	Final warning	Confirm completion today
Due date	Due today	Must be actioned today
Overdue	Non-compliant	Act immediately — document reason for delay

13.2 Alert Colours Inside the App

Colour	Meaning	Action
● RED	Overdue or due today	Act immediately
● AMBER	Due within 7 days	Act soon
● BLUE	Submitted / awaiting review	Check and validate

13.3 What to Do When You Receive an Alert Email

1. Log into PCT.
2. Click the ■ notification bell or go to the **Alerts** tab.
3. Click **Action** directly on the alert card.
4. Complete the required action — renew, submit evidence, validate, or update the record.
5. The alert clears automatically once the record is actioned.

■ You can dismiss an alert card temporarily — but the underlying record still needs to be actioned. Dismissed alerts reappear if the item remains unactioned.

14 ACTIVITY LOG

A complete, automatic record of every action taken in the system — who added, edited, updated, or actioned any record, and exactly when. Nothing needs to be filled in manually.

Use the Activity Log tab if you need to check when something was last updated, who made a change, or to verify that an action was completed.

✓ The Activity Log is append-only — nothing can be deleted from it. This makes it a reliable audit trail for inspections and reviews.

✓ Export PDF: In the **Activity Log** tab, click the ↓ **Export PDF** button (top-right of the tab). The system generates and downloads a PDF report of your current filtered view automatically.

15 BUILT-IN QUICK GUIDE

PCT has a built-in Quick Guide panel available on your home dashboard. You do not need to carry this document while doing daily work — the help is already inside the app.

The Quick Guide shows:

AMC Workflow: Step-by-step stages from Pending to Completed with what each stage requires.

Quality Workflow: How quality activities move from Pending to Completed.

Evidence Rules: Exact character minimums for Submit, Validate, and Send Back actions.

Role Permissions: What each role can do — Staff, Coordinator, Quality Manager, Manager.

■ Look for the **SOP Quick Guide** panel on your home screen — it is always one click away whenever you need a reminder of a workflow step or evidence rule.
